## DETAILED ACTION

### *Priority*

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-16 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent no. 4,614,161 to Frederick.

Frederick discloses, among other things, a method of lacing a generally toroidal coil provided with slots in an electric machine, by means of an apparatus comprising: a support for the coil, capable of angularly rotating the coil; a needle 42 having an open eye 44, the needle 42 having an axis and being rotatable relative to the toroidal coil to enter and leave a region defined inside a perimeter of the coil; a feeder (28, 30) for a lacing cord 32, the method being characterized in that it causes wrapping of the lacing cord around the needle while the latter is radially moving, before the needle leaves the region defined inside the perimeter of the coil (see Figures 5-8).
